

CLAIMS

1. A surface substrate film for a motor vehicle brake disc antirust film, characterized by having a tensile modulus of elasticity of 220 MPa or more.
2. The surface substrate film for a motor vehicle brake disc antirust film according to claim 1, wherein the surface substrate film has a tensile modulus of elasticity of 220 to 2200 MPa.
3. The surface substrate film for a motor vehicle brake disc antirust film according to claim 1 or 2, wherein the surface substrate film comprises an ultraviolet absorber in a proportion of 0.01 to 20 parts by mass relative to 100 parts by mass of the surface substrate film in such a way that the spectral transmittance of the surface substrate film in a wavelength region from 200 to 380 nm falls within a range from 0 to 20%.
4. A motor vehicle brake disc antirust film, characterized by comprising a pressure-sensitive adhesive layer on one surface of the surface substrate film according to any one of claims 1 to 3.
